All Brand Affiliates are able to receive payments on earned commission bonuses. The following information is not applicable to Members and Customers.

You must set up your Direct Deposit before your Nu Skin Bonus Account can send money to you.

A Bonus Account (also sometimes called a Flex Account or V&G Account) is a virtual account that reflects and contains all compensation activity, adjustments, and payments distributed by the Company. You receive this account when you become a Brand Affiliate. Your Nu Skin Bonus Account does not accrue interest.

You may transfer your total available balance from your Bonus Account to your designated financial institution at any time. However, you will have to pay a small fee for transfers that you initiate. Nu Skin will automatically transfer the remaining Bonus Account balance at the start of each Weekly and Monthly pay period as long as the total balance in the Bonus Account is at least \$10 USD or \$15 CAD.

You can view your Sales Performance Plan Account through Nu Skin's Volumes & Genealogy (US/CA) page, clicking on Commissions, and then Earnings.

I believe its called the Nu Skin Bonus Account, not the Sales Performance Plan Account,
