

Klarna not approve my order?

Last Modified on 11/03/2023 3:52 pm MDT

Klarna makes credit decisions based on available credit decision data in real time. We are a financial institution and must always lend wisely, based on whether consumers are able to pay debt at the time of purchase, and not always based on historical lending assessment. Additionally, your card provider may not have approved the purchase if the card payment was required upfront.
